Full Stack Developer
Object-Oriented Programming | Web Development | Data Analyst

Summary of Skills

- A results-driven student of Software Engineering Technology at Centennial College, who holds a Bachelor of Engineering Degree and Coding Bootcamp Certificate from the University of Toronto
- Experienced in building scalable web applications, responsive web UI, RESTful APIs & database management
- Programming enthusiast, with the ability to design, build and maintain applications from ideation to production
- Quick learner with strong analytical skills, problem-solving skills, and an interest in learning new technologies

Technical Skills

Cloud Technologies:	AWS EC2, AWS S3, AWS RDS, AWS LAMBDA
Web Frameworks:	JQuery, React, Node.js, Django, Express, Handlebars, Bootstrap, Laravel
Web Technologies:	GraphQL, REST, JSON, AJAX, XML
Programming Languages:	JavaScript ES6+, Python, Java, C#, HTML5, CSS3, Visual Basic for Applications
Programming Concepts:	Data Structures, OOP, Design Patterns, PWA, DOM
Databases:	MySQL, PostgreSQL (SQL), MongoDB (NoSQL)
Operating Systems:	Linux (Ubuntu), Windows, Mac
MVCCs:	Git, GitHub

Work Experience

Developer - Maersk - Mississauga, ON   Sept 2018 - Present
Designed, and developed shipment management applications using React JS, MySQL, RESTful web services, Node, Express, JavaScript, Visual Basic (VBA) macros, HTML, CSS
- Developed a tracker that reduced the shipment tracking time by half, allowing to search containers in bulk
- Designed and developed a tracking dashboard to monitor shipment location and release status
- Created a program to QA data entries filed with Canadian customs and regular testing of new features
- Designed parser to convert invoices in PDF and Excel formats to XML

Senior Analyst - APL Logistics - Gurgaon, India   July 2016 - June 2018
Developed & tested global trade compliance management application with PHP, JavaScript, HTML, CSS, MySQL
- Worked in an Agile scrum development cycle to design, develop and test the trade compliance web application
- Developed and maintained trade compliance databases for multiple countries using MySQL, XML, and Excel
- Built VBA macros to compile data from multiple databases for ETL and analytics, reducing the time by 80%

Data Analyst - Molex - Bangalore, India   Aug 2015 - June 2016
Gathered data for product classifications and updated SAP databases
- Classify and maintain HS code database of manufactured products on SAP system for various countries
- Analyze rules of origin to determine qualifying status of products under Free Trade Agreements

Data Analyst - Aptean - Bangalore, India   Feb 2014 - Aug 2015
Performed as a data analyst, managed customs databases, and supported the design of data extraction tools
- Designed backend process to capture trade compliance data from customs websites of different countries
- Maintained Global Trade Management (TradeBeam) databases and perform code testing

Education & Professional Development

Software Engineering Technology (Co-op) Advanced Diploma   Present
Centennial College, Toronto, ON

Coding Bootcamp Certificate - Full Stack Development   2021
University of Toronto, Toronto, ON, Canada

Certified Amazon Web Services (AWS) Cloud Practitioner   2020

Bachelor of Engineering - Electronics and Telecommunication   2010
University of Mumbai, Mumbai, India

Projects

Booklyst *(MongoDB, Express, Node.js, React JS, Redux, GraphQL, Web Scraping, JavaScript)* | *GitHub*
- Allows users to search for books with text, speech, or by taking a picture and lets them save their favorites
- Captures book data from retail websites, like the type of book, availability, and price using web scraping

Smart Fix *(HTML, CSS, NodeJS, Express, MySQL, API, Handlebars, JavaScript)* | *GitHub*
- Connects customers with service providers for household repairs and maintenance
- Allows users to register as a customer or service provider, with different functionality based on user type
